CORRECTIONS TO
THE DISC EMBEDDING THEOREM
OXFORD UNIVERSITY PRESS

MARK POWELL AND ARUNIMA RAY

(1) page 158, fifth line from bottom. Replace A by f.

(2) page 181, fourth line of Definition 12.14. Replace "$A_1^i \pitchfork T_j^c$ is a single point in the bottom stage of T_j^c when $i = j$" with "$A_1^i \pitchfork T_j^c$ is a single disc fibre of the bottom stage of T_j^c (so that the spines of A_1^i and the bottom stage of T_j^c intersect at a single point) when $i = j$".

(3) page 218, start of Section 15.2.1. Replace "Consider a tubular neighbourhood of γ intersecting A and B in small discs about p and p'. Cut out these discs from $A \cup B$ and glue on the rest of the boundary of the neighbourhood of γ to $\Sigma \cup \Sigma'$" with: "Consider a tubular neighbourhood of γ intersecting Σ and Σ' in small discs about p and p'. Cut out these discs from $\Sigma \cup \Sigma'$ and glue on the rest of the boundary of the neighbourhood of γ to $\Sigma \cup \Sigma'$ minus these discs."

(4) page 281, third line from top. The phrase "and virtually polycyclic groups" may be deleted, since (virtually) polycyclic groups are also (virtually) solvable.

(5) page 314, end of Section 21.4.8. Add the following sentences and the corresponding citation: "We record here that there is an error in the proof of [FQ, Lemma 9.3B] as observed by Venema in [Ven97]. That lemma was used by Freedman and Quinn to show that certain local homotopy properties imply that a given 2-dimensional subset of a 4-manifold is locally flat. Venema gives an improved statement, bypassing the lemma, in [Ven97]."

(6) page 322, ninth line from bottom. Change citation to [BL78, Theorem 1.4].

(7) page 325, tenth line from bottom. Change $+2$ to -2.

(8) page 359, last line of Definition 23.6. Replace $\pi_1(f)$ by $\pi_1(f')$.

(9) page 378, first displayed equation. Remove the errant $=$ sign.

(10) page 464. Add reference [New66] M. H. A. Newman. The engulfing theorem for topological manifolds. Ann. of Math. (2), 84:555–571, 1966.

(11) Back cover, list of editors: Add accents, Boldizsar Kalmar $\rightarrow$ Boldizsár Kalmár.

Corrections or suggestions sent to mark.powell@glasgow.ac.uk and/or aruray@mpim-bonn.mpg.de will be gratefully received.
